Name :-				Gaurav shenoy K
S.No	Date	Days	Training On	Task Description
1	03-Mar-25	Monday	1. type script for react 2.react basics	React basics and Type script concepts
2	04-Mar-25	Tuesday	1.Ticketing system backend code 2. React concepts	1.Creating and reusing buttons, input fields using react. 2. Ticket backend code analysis
3	05-Mar-25	Wednesday	1.Ticketing system backend code 2. React concepts	Building custom and reusable input fields and buttons, navigator files
4	06-Mar-25	Thursday	Ticket system backend code	workflow, model used in existing ticketing system
5	07-Mar-25	Friday	Ticket system backend code	Debugging errors and logical conflict in existing ticketing system backend
6	10-Mar-25	Monday	Ticket system backend code	Correcting errors and logical conflict in existing ticketing system backend
7	11-Mar-25	Tuesday	React concepts	1.creating components 2.handling event 3.useState (react hook) 4.passing data, function via props, passing children 5.button component showing event based alerts
8	12-Mar-25	Wednesday	React concepts	1. Styling components in react, vanilla CSS, CSS modules, CSS in java script, popular libraries, adding icons, like button

9	13-Mar-25	Thursday	React concepts	1.creating expandable texts 2.building form 3.handling form submission 4.accessing input field 5.applying validations, schema based validation 6.disabling the button
10	14-Mar-25	Friday		Optional Leave Holi
11	17-Mar-25	Monday	React concepts	1.simple expense tracker application using React 2.useEffect and useState 3.Axios
12	18-Mar-25	Tuesday	Ticketing application	Connected msql database with Ticket backend with dumb data
13	19-Mar-25	Wednesday	Ticketing application	Resolved dashboard and handled 2 wrong backend api conflict
14	20-Mar-25	Thursday	Ticketing application	Resolved ticket sub category conflict and also provided smooth managing of tickets so that data base remain efficient and no redundant
15	21-Mar-25	Friday	Ticketing application	modified the add option for different functionality in the ticket application frontend
16	24-Mar-25	Monday	Ticketing application	Learning how to achieve email configuration to automate the ticket creation process and work flow of ticket.
17	25-Mar-25	Tuesday	Ticketing application	camunda workflow engine and decision engine to establish simple workflow
18	26-Mar-25	Wednesday	Timesheet application	1. Connected Postgres database to time sheet backend with docker compose 2. Designed a model for time sheet.

19	27-Mar-25	Thursday	Timesheet application	1. Implemented models 2. Configured base class as common foundation for time sheet application.
20	28-Mar-25	Friday	Timesheet application	1.Java script 2.Type script for React
21	31-Mar-25	Monday		Optional leave Id-ul-Fitr
